

# LIMPAR

/// QUALITY MADE IN GERMANY ///

## // LIMPAR RADIAL //

### DETAILS

- Working width 85 cm
- Right-/Left brush rotation
- Stable support wheel
- Brush height adjustment
- Charger and battery included
- Electric or combustion engine

This powerful radial sweeper solves difficult tasks. The broom fits perfectly at any corner or unevenness. The battery-powered version is quiet and ideal for noise sensitive areas such as barns or residential areas.

The stable housing in conjunction with the adjustable wheel axle in height and tilt, large, stable air tires, powerful engines and easily replaceable brush segments lead to a large reduction in workload. Due to the standard track stabilizer, this machine moves straight on. The rotation direction of the brush can be switched at all radial models.
