

# LIMPAR

/// QUALITY MADE IN GERMANY ///

// LIMPAR V40 / V50 //

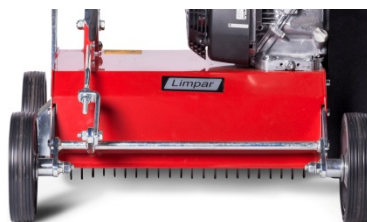

## DETAILS

- Working width 40 or 50 cm
- Stationary or flying blades
- Variable height adjustment
- 4-stroke Honda petrol motor

A beautiful, green lawn requires special care. In addition to mowing, in particular, regular scarifying is required. Our scarifiers free the turf of weeds, moss and lawn thatch, so that water and nutrients can again get to the roots. With their hardened blades they chop the flat-growing weeds, comb out the moss and gently loosen the soil so that fertilizer and nutrients can again get to the roots. The lawn is gently maintained and will soon be a luxuriant green again.

The V40 and V50 have a stable, robust and torsion-free housing with hardened blades for long satisfaction with your device, steel rim tires with ball bearings, and they are driven by powerful motors - ideal for professional use in harsh conditions or for the demanding user.
